

# **A Short Flood Damage Report of Project area District Kachi**

Date of visit: October 2022

Author: Abdul Salam

Due to recent flood, five district of Naseerabad division, Baluchistan are affected.

- 1- Kachi/Bolan
- 2- Naseerabad
- 3- Jaffarabad
- 4- Suhbat pur
- 5- Jhal Magsi

In Kachi District 78 villages (in our project area, tehsile Bhag) are badly affected by the flood. People lost their lives, households, agriculture, livestock, lath bundi, village flood protection walls, drinking water ponds and their agriculture systems.

## **1 - Damage of Houses**

An estimated 2100 houses are damaged due to the flood. The villages which were on river side are completely destroyed due to flood and others are partially damaged. In tehsile Bhag, due to heavy rainfall many houses are damage.

## **2 - Kharif Crop**

Sorghum is the major kharif crop which is cultivated on 50% of the agricultural area and typically harvested in the months of August and September. Due to recent flood and heavy rains, this crop also destroyed, which badly affects the farmers economically. The sorghum crop was also a pull factor for nomads. 15000 to 20000 nomads come to this area annually with their animals and purchase the sorghum crop for their animals. Due to absence of this crop these people will not come to these areas.

### 3 – Lath Bundi

The floods badly damage the spate irrigation and agriculture system of the area. The laths of the fields are completely destroyed in most of the area. In this year people cultivate the Rabi crop but due to damaged Laths people will not able to store the next flood in the fields.

### 4 – Protection walls

The flood protection walls of the 70+ villages are damaged due to the flood. These need to be reconstructed, to provide protection during the next flood season.

## 5 - Drinking water ponds

People of the area depends on ponds for drinking water. These ponds are filled with flood water during the flood season. Due to heavy floods, which came with a large sediment load, these ponds are silted up and some of the reservoir are washed away.

## 6 - Roads

Due to the floods, inter roads of the villages are washed away.

## 7 – Livestock

During the flood, peoples are busy to save the lives of their love ones, but the livestock is badly affected by the flood. Almost 1500 small and 200 large animals are drowned in the flood. The surviving livestock also face fodder crisis due to absence of kharif crops.

## **8 - Fodder crisis**

The kharif crops were washed away, as a result in coming months of December and January people will face the fodder crisis for their livestock. In winter when there is no green fodder due to hard weather sorghum and its biomass are normally used as a fodder in the area and also sold to Quetta and Sindh. Flood affected the sorghum crop which cause fodder crisis also in the winter.

## **9 - Increase in Price of Seed**

The prices of seed in whole area is increased by 70% which affects farmers badly.

## **10 – Smaller Area Cultivated**

Due to the increase in the prices of seeds, most of the people are not able to purchase the seed because they are badly affected economically by the flood so in this year it is expected that there will be 40% smaller area with crops. When there will less crop it also effect on the other people which are inter connected like the person who work as a labor, the tractor owners, the seed traders, etc.
